1. Introduction:

The new and advanced IRIS (Immigration and Refugee Information System) application is a comprehensive platform crafted to streamline case management processes and improve usability and efficiency for refugee programs. Within the context of case management, the Pre-Arrival status represents a pivotal stage where crucial preparations and arrangements are made before the arrival of a case. During this phase, important information is collected, verified, and processed to ensure seamless coordination and assistance provision upon the individuals' arrival. RAs and affiliates will notice that several aspects of Pre-Arrival case management have received substantial enhancements, leading to the automatic creation, and streamlining of tasks that were previously manually performed.

As one of the top applications in the industry for managing all aspects of refugee operations, IRIS has recently undergone various changes to enhance usability, accessibility, and user satisfaction. It has adopted a modular design approach to simplify workflows, increase efficiency, and empower RAs and affiliates with more control over their interactions with the application.

2. Pre-Requisite

- Access to the IRIS application.
- Appropriate permissions to access the main dashboard page.

3. New Feature Enhancements:

To enhance and automate the Pre-Arrival process, IRIS has introduced six updates aimed at refining the user experience for RAs, fostering greater efficiency and effectiveness,

- 1) **Biodata Import:** Automatically associating cases with R&P or Virtual-R&P programs based on the biodata feed.
- 2) **Case Placement:** This functionality enables assignment of cases to Virtual R&P offices for affiliate staff to handle.
- 3) **USTie Verification:** This capability allows RA and Affiliate Users to verify USTie enrollment for Virtual R&P Program.
- 4) **Placement Update:** Updating Placement City and State to match USTie information under Assurance.
- 5) **Assurance Approval:** These features enable RAs to review and accept all submitted assurances by Affiliates under the Virtual R&P program, with convenient export options to RPC/START team.
- 6) **The Program Type Addition:** The addition of Virtual R&P (VRP) as a Program Type in IRIS ensures that all eligible cases are appropriately associated with this program type.

4. Biodata Import Process Update

This feature revolutionizes the process of uploading refugee biodata into IRIS through File Cloud, providing a seamless integration that automates the association of cases with either the R&P or Virtual-R&P programs.

To accomplish this task, the partners have utilized a data element available in biodata file, called 'Virtual Resettlement Preference' flag. This flag will help in updating the value to 'Yes' or 'No' for a new column named 'Virtual', added under Pre-Arrival > Assurance > US Ties.

In the example below, 'No' means the case was not eligible for VR&P and was automatically assigned to the R&P program category based on preset 'Virtual Resettlement Preference' flag. Similarly, if you see a value of 'Yes', then it means the case was Virtual R&P and was automatically assigned to the Virtual R&P program category. Case category will appear next to Enrolled Programs.

5. Case Placement by RAs

Pre-arrival process starts when a case is placed with the affiliate. This is a pre-existing process where RA assign a refugee case to their affiliate staff.

RAs can place a case with affiliate, by simply navigating to Main IRIS Dashboard > **Case Management** > **Place Cases**. This action will take the user to a new page related to “**Case Placement**”. It lists all the cases that have not yet been placed. **Select a case** that needs placement. On the case information page, click on **Placement** tab under **Pre-Arrival**. The below screen will be displayed.

Co-Sponsors

Status	Name	Co-Sponsor > 50 Miles From Affiliate or Across State Line	Primary
<input type="checkbox"/> Assure this as an Agency Sponsored Case			

As soon as the case is placed with an affiliate, the details of Placement City and State is displayed. Earlier our affiliate partners did not have the ability to manually change the placement city and state but now with the new enhancement they are provided the ability to do so.

6. Assurance Process

6.1 Assure as Agency Sponsored:

During the assurance process, affiliates can do so with their affiliate agency, that means the placement city and state will be same as where the affiliate office is located. If the assurance is Agency sponsored Case, affiliate need to click on the checkbox to have it indicated on the case (as shown in the screenshot).

[Redacted]	Son	[Redacted]	No	M1	N/A	N/A
[Redacted]	Daughter	[Redacted]	No	M1	N/A	N/A
