

IRIS Release Notes v.6.7.6

May 3rd, 2023

Enhancements

Request ID	Subject	Category
344470	Interest Pre-Case Email Notifications	Administration
Added functionality to Interest type Pre-Cases to allow status for <i>Correction Needed</i> and <i>Submit Corrections</i> , so Interest Pre-Case functionality mirrors AOR type. Additionally, we added email notifications to accompany these changes in Pre-Case status, so Affiliates and RA's will be notified when action is taken.		

Bug Fixes

Request ID	Subject	Category
344772	CO-Assessment Print Error	Reports
Corrected an issue when generating CO-Assessment where PDF title would say <i>Lutheran Immigration and Refugee Service</i> instead of the name of the RA. JIRA Support Ticket: AP-4769		
344688	Arrival Reconciliation Errors	Administration
Corrected a couple issues where Monthly Reconciliations Type would display Type as <i>Initial</i> , after clicking into Reconciliation Report would display <i>Final</i> . Corrected an issue where <i>Reporting Year</i> would display calendar year date from load date instead of the Fiscal Year date range. JIRA Support Ticket: AP-4557		
344111	Update R&P Report	Reports
Updated the R&P Report Health Screening information to display <i>Within 30 days of arrival</i> to correct former 90 days. Additionally updated tool tip text for this action. JIRA Support Ticket: AP-4557		
344131	GeoMatch Report Filter Error	Reports
Corrected an issue where Data Range filter would not include results from the final day set in range. For Example, if range was set Between January 1, 2023 and January 31, 2023 the output would reflect results through the 30 th not including the 31 st . JIRA Support Ticket: AP-4695
